RISK REDUCTION OVERVIEW

Web Application Overview

What is The RRP?

- The Risk Reduction Program is a Commander's Program designed to decrease soldiers' high-risk behaviors (i.e. Substance Abuse, Suicide, Spouse/Child Abuse, AWOL…) thus increasing soldier and mission readiness. It is visually presented as a target that depicts 14 high-risk behaviors.

- High risk behavior rates are displayed on a shot group. Rates in the red ring could indicate the problem areas.

- From this the commander can decide which action to take to solve the behavioral problems.

- The program focuses on effective use of installation resources and coordinates effort between agencies utilizing the Installation Prevention Team to implement effective interventions.

Risk Reduction Program History

The Risk Reduction Program originated as a reengineering effort at Ft Campbell, KY in 1994 to address a series of high risk incidents. The Army Center for Substance Abuse (ACSAP) expanded the program as a tool to prevent, reduce, and manage high risk soldier behaviors. The Risk Reduction Program promotes a prevention-focused approach when dealing with personal problems and promotes focused and coordinated actions on the part of installation agencies and the chain of command in battalions with high risk profiles.

RRP Brief History

- 1994 - At the direction of Gen Keene Ft. Campbell develops Risk Reduction
- Jan 1995 - The Army Center for Substance Abuse (ACSAP) expands the program.
- Jan 1996 - RRP supports 200K active duty soldiers
- July 2002 - FORSCOM makes RRP mandatory
- Oct 2002 - TRADOC makes RRP mandatory
- Jan 2003 - Reserves make RRP mandatory
- Feb 2003 - RRP supports 350K active duty soldiers
- Oct 2003 - Risk Reduction Web-based system operational
- May 2004 - Well- Being GOSC recommends Risk Reduction become a formal Army Program
- Oct 2004 ACSAP begins staffing of ALARACT package with principals and MACOMS.
- Mar 2005 ALARACT package sent thru HQDA channels
- Aug 2005 ACSAP begins process of securing funding for Risk
- Feb 2007 Risk funding comes thru IMCOM channels
- Sep 2007 Risk contract for Coordinators awarded thru IMCOM
- Coordinators hired, trained and in place Jan 2008

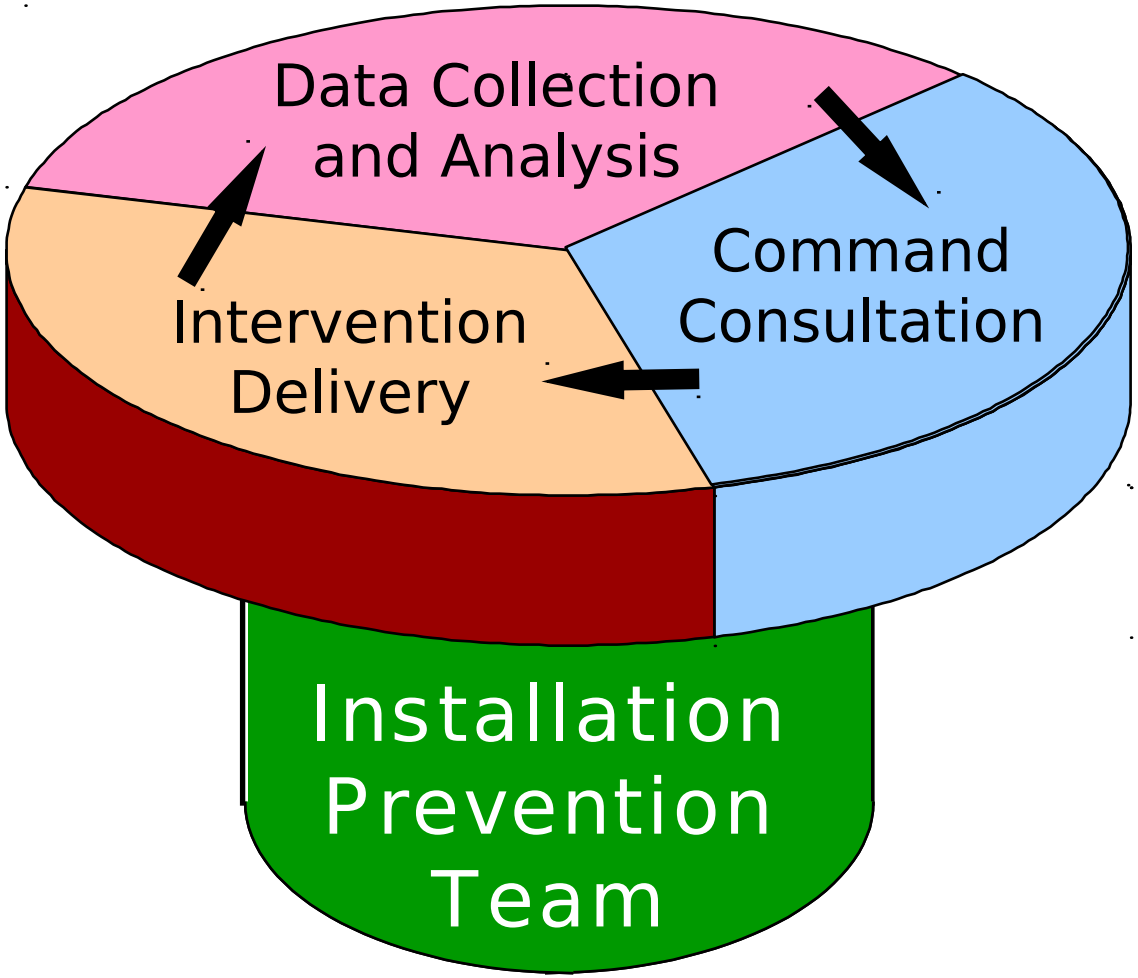
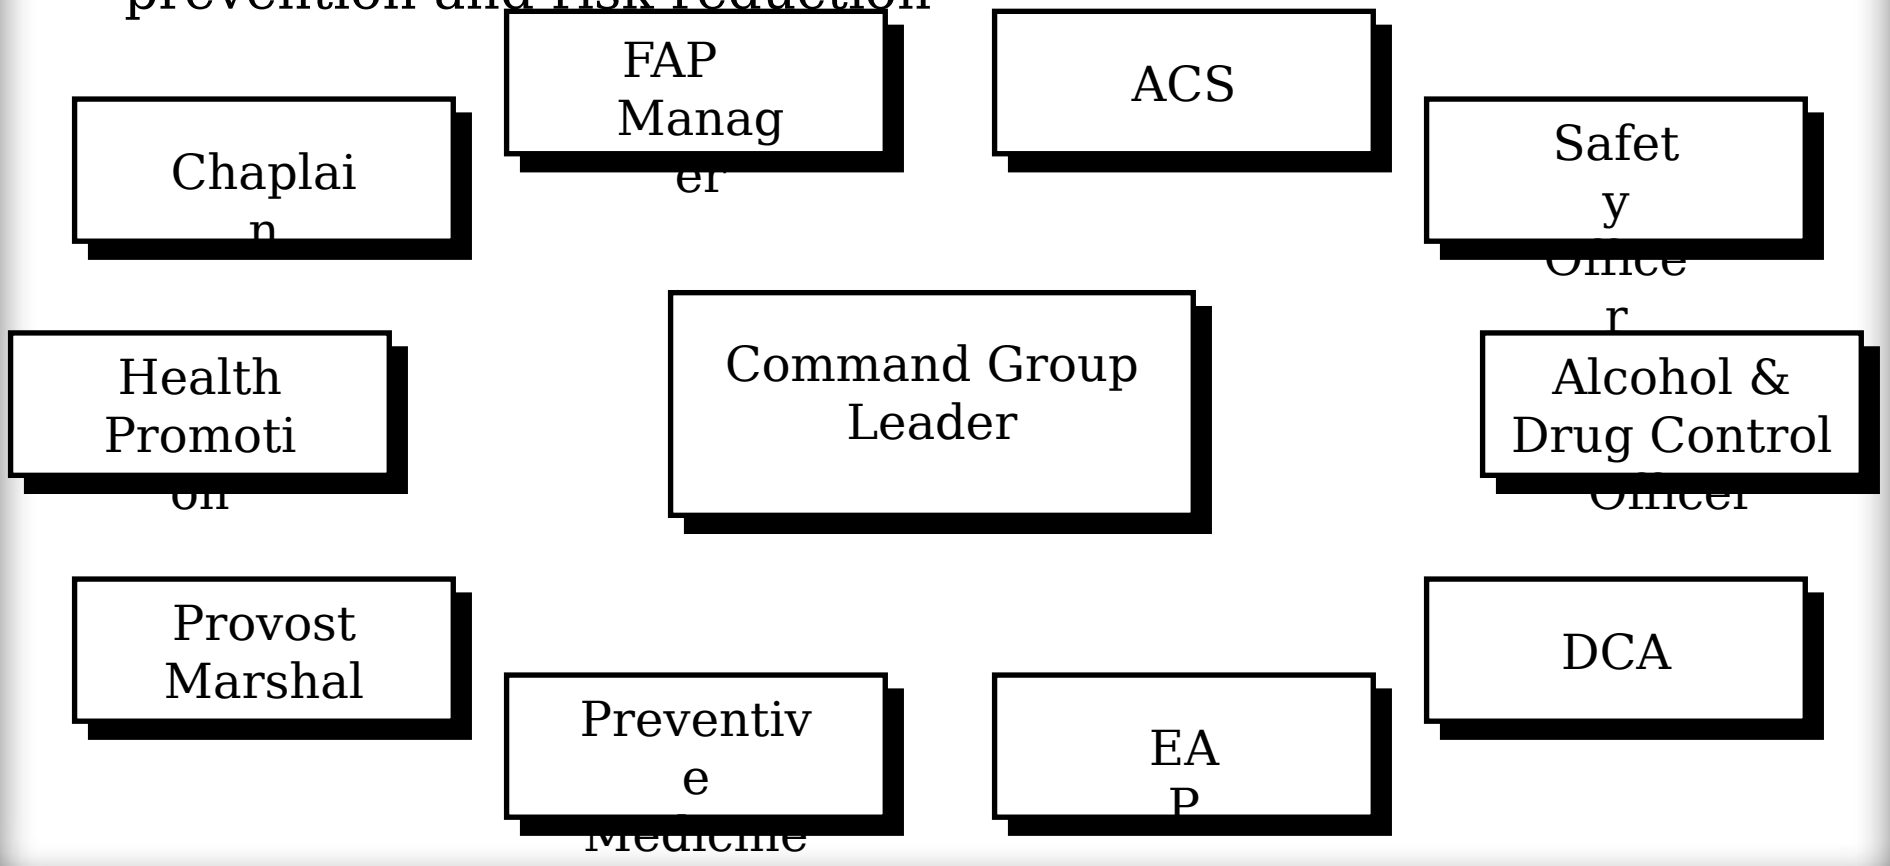
Risk Reduction Components



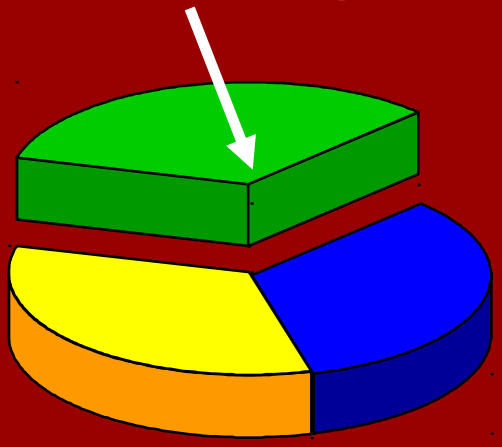
What is The Installation Prevention Team?

- 6-8 member teams selected by Installation Commander
- Key personnel who may speak to and commit resources for installation-wide prevention and risk reduction



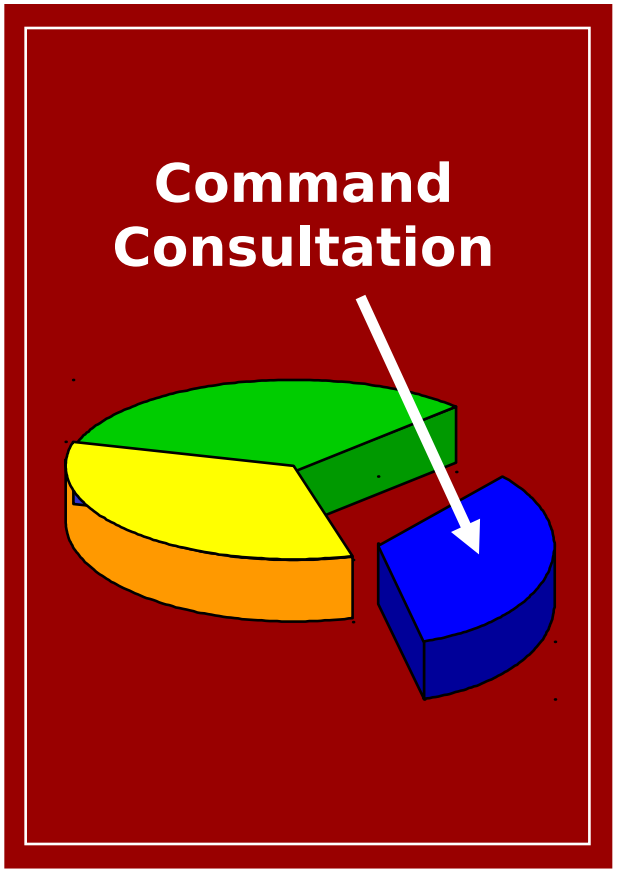
Risk Reduction Data Collection & Analysis

Data Collection and Analysis



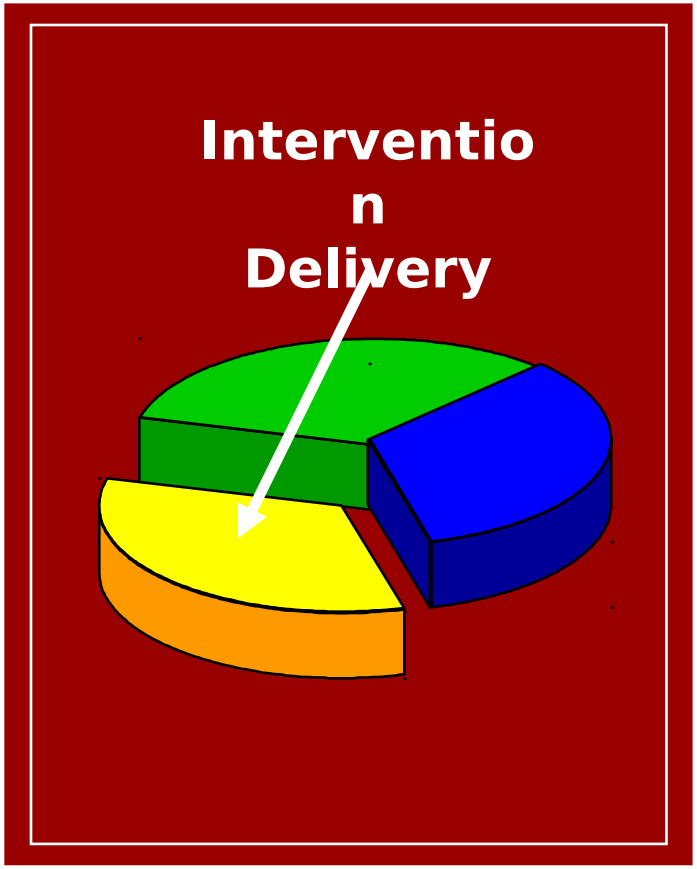
- Data collected quarterly from Installation sources: Provost Marshal, Alcohol & Drug, Safety, Army Community Services, Family Advocacy, Preventive Medicine, Chaplain's Office, Community Mental Health, Staff Judge Advocate
- Data consolidated by Risk Reduction POC
- Data processed by Risk Reduction Software
- Reports produced by Risk Reduction Software
- Reports analyzed by Installation Prevention Team
- Recommendations developed

Command Consultation



- Command consultation meetings held at Battalion Level
- Information Briefings conducted at Installation and Brigade levels
- Target areas identified and recommendations reviewed
- Commander approves/disapproves suggested actions
- Commander’s action plan scheduled

Risk Reduction Intervention and Delivery



- Implement Commander’s action plan
- Conduct Unit Risk Inventory (optional)
- Leaders & Installation Prevention Team work together, within unit training and deployment schedule
- Results of prevention/interventions evaluated
- Adjust, Refine, Fire for Effect

About
Reporting
Unit Ranking Results
Ranking of Units based on a selected Year, Quarter and Data Collection Group / Aggregate Reporting Group.
Risk Factor Summary
Presentation of Risk Factors for a selected Year, Quarter and Data Collection Group / Aggregate Reporting Group.
Risk Factor Trends - Graphs
Regression line graphs are rendered based on every Risk Factor for a selected Installation, DCG or Unit. Additionally, the Army's trend line is shown on each graph for comparison.
Risk Factor Trends - Data
Historical incident rates for a selected Installation, DCG or Unit are rendered along with the associated Army rate.
Shot Groups
Customized graphical report based on a selected Target and Parent entity as well as a selected Year and Quarter. Factor incident rates for the target and parent entities are compared to those of the Army and are rendered as bullet holes and icons on a target.
Matrix Report
Displays Risk Factor incidence rates for Units within a desired DCG compared to the overall Army rates in a Red/Amber/Green Matrix format.
Installation Summary Report
Displays risk factor incident rates for a selected Installation and Reporting period.
DCG Summary Report
Displays risk factor incident rates for a selected DCG and Reporting period.
Brigade Summary Report
Displays risk factor incident rates for a selected Brigade and Reporting period.
Battalion Summary Report
Displays risk factor incident rates for a selected Battalion and Reporting period.
Company Summary Report
Displays risk factor incident rates for a selected Company and Reporting period.

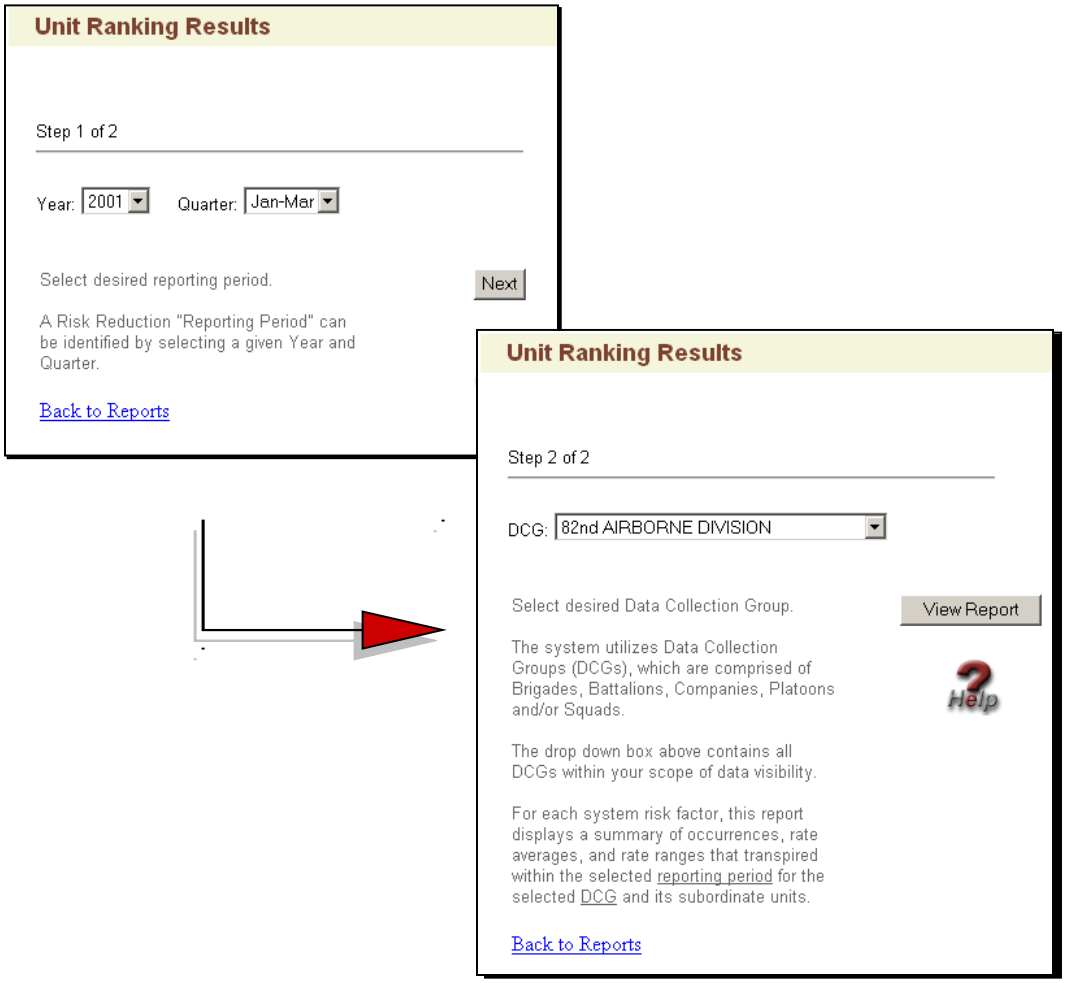
Reports – Wizard Based



Unit Ranking Results
Step 1 of 2
Year: 2001
Quarter: Jan-Mar
Select desired reporting period.
Next
A Risk Reduction "Reporting Period" can be identified by selecting a given Year and Quarter.
Back to Reports
Unit Ranking Results
Step 2 of 2
DCG: 82nd AIRBORNE DIVISION
Select desired Data Collection Group.
View Report
The system utilizes Data Collection Groups (DCGs), which are comprised of Brigades, Battalions, Companies, Platoons and/or Squads.
Help
The drop down box above contains all DCGs within your scope of data visibility.
For each system risk factor, this report displays a summary of occurrences, rate averages, and rate ranges that transpired within the selected reporting period for the selected DCG and its subordinate units.
